Contract-Quote for Holiday Lighting

Mission Statement

To create exceptional custom designed displays that not only look beautiful but are dependable and safe as well. We also put safety first for all of our employees

Rob Peters Owner

Services provided

Installation service

We will install the agreed upon display in a timely fashion and guarantee our work through the end of December. We will set timers if provided either upon the installation or on the date of your choice. We highly recommend early installations as we can work out any issues should they arise.

Power

This is the most common issue we deal with for both commercial & residential displays. It is the customer's responsibility to make sure that you have the power available for your chosen display. 95% of the time people underestimate the power they have available. If in doubt have your electrician call us or have designated circuits. It is not our responsibility if you insist on a display that is too close to capacity & blows each time it rains. We will do our best on the initial consultation to advise you on the type of display that is appropriate & safe for your system.

Monitoring

We will monitor your display for the duration of the holiday season (December 31st). There will be a service charge for changing out bulbs. We are not responsible for acts of god such as extreme weather events. We will always repair any display that does not function because of faulty lights, timers, or cords that we provided.

Materials

We strongly recommend using our materials as we always use new lights & will know exactly how many lights you will need. We also guarantee our materials. If you provide us with faulty or old lights you may not be pleased with the results.

Removal

We will have all displays removed by January 20th unless removal is not desired. The minimum removal charge is \$75.

Payment

All payments are due the day of completion of the job. Deposits are due on larger jobs if we are fronting materials.
